Sundial

## HOW TO CREATE YOUR ELEMENTS

**Disclaimer:** those elements do not allow an exact measurement of time but aim to make the concept easier to understand.

The leporello is a particular narrative format that allows for the creation of a continuous narrative that unfolds and evolves in its successive facades. It consists of a long strip of paper folded in an accordion or zig zag pattern and owes its name to the eponymous valet of Don Giovanni in Mozart's opera, who has a similar pamphlet in which the names of Don Giovanni's mistresses are noted.

### LEPORELLO

Two equal strips can be made from an A3-sized sheet by cutting lengthwise. Then simply fold each strip in half and then again in half so as to obtain four equal parts. By doing so, you will have a book consisting of eight "pages" on which to distribute the story. The two sides allow you to create two different settings, for example: before the invention of the sundial and after.

### STORAGE

This activity can fit in an envelope.

For the different alternatives (see part below), you may need up to a shoe box to store the elements.

Co-funded by  
the European Union

MY BOX OF STEAM (project nr. 2022-2-EE01-KA220-SCH-000099273) is funded by the European Union. ## CRAFT THE ELEMENTS

### A. Print the Annexes

1. On an A3 sheet (at least 220gr), print the annex "Sundial - Base". You can create material for 2 activities with 1 print.
2. On an A4 sheet, print the annexes "Sundial – Figures".

### B. Prepare the base

Follow the instructions below. The marks on the "Sundial - Base" you have printed indicate the cut or fold locations.

1. Cut the sheet in half lengthways.

2. Create 4 equal parts by folding the slice twice. This will give the paper the usual zig-zag pattern.

3. Flatten the paper.

# TECHNOLOGY

4. Cut the top of the circle and the top radius.

5. Cut the base of the gnomon and fold it.

6. Glue the 2 pics together and fold the base.

# TECHNOLOGY

7. Embed the gnomon in the cut made in the silent book.

Voilà, you have your sundial!

## C. Prepare the figures.

Simply cut the figures.

## D. Merge the sundial and the figures.

Finally, you can glue your figures on the Sundial to illustrate your story! Have a look at the story we created to see how the figures could fit.

## ALTERNATIVES

### A. A sundial in the courtyard

If the head of your school agreed, you can create a sundial in your courtyard. You can use paint for a permanent option, otherwise simply use chalk. If you have some grass or natural area, you can use big flat stones. In average, the hour lines are spaced  $15^\circ$ . The correct place for the gnomon will change along the year as the position between the sun and earth is moving: hopefully, you can draw a ruler defining the position according to the month you're in!

### B. Laser cut

If your school has a makerspace nearby, you can work with them to create a sundial with a laser cutting machine. If you do this, we recommend to store the sundial in a shoe box.
